

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Freshly retired, after spending numerous years working with his brother to manufacture their crane business into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

All through their journey, John reacquainted himself with past business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could swiftly and securely lift people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they manufactured and sold the first JLG aerial work platform. The company incorporates some of the basic design essentials of that original lift into existing models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the marketplace. As of today, the business has expanded itself into a number of global markets and continues to cultivate innovative machines to guarantee that clients are able to become safer and more resourceful within their workplace.
