

Aerial Work Platforms

Aerial Work Platforms - There are numerous accessories meant for forklifts which can be utilized so as to help expand the capabilities of your forklift and allow you to pick up stuff, handle materials with out difficulty or to finish clean-up tasks.

Many of the accessories are specifically designed to be able to fit on the forks themselves. Blade extensions for instance, are utilized when you need more blade length, which increases lifting capacity. Blade extensions come in lengths ranging from 48-120 inches. Triangular or rounded attachments are one more variety utilized whenever moving rolled material so as to ensure it does not roll off of the traditional flat blades.

Examples of lifting accessories consist of pivoting and telescoping crane or boom attachments. They can come in quite a few different kinds and are normally meant for moving metal bars, lumber, poles and other types of bulky stuff. Other accessories like for instance various kinds of hook plates and hooks are offered to be able to pick up items using a chain or sling. Slab lifters and magnetic lifters are other stuff that can be utilized along with hook accessories. Slab lifters are specialized attachments which are intended for picking up various materials which are delivered in a slab or sheet format. Rug rams or carpet poles are other lifting tools that attach to your lift truck to be able to make moving rolls of carpet a lot easier. The attachment connects onto the lift truck's forks and has a pole which goes through the middle of the carpet roll.

There are several different types of lift truck attachments that could be designed for facility maintenance such as snow forks. These forks attach to front end loaders and could transport materials like for example dirt, soil and snow. Other popular cleanup attachments consist of magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the forklift forks connect onto for sweeping large spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal fragments like on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up quick and easy.

A material spreader is one more lift truck attachment that is often utilized at facilities. These spreaders are useful for a range of applications like for example spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting attachment that a lot of companies use day after day. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models presented which are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location making use of the forklift. Larger platform units have added space for workers to bring tools and other essential stuff for the job. Often work platforms are constructed of poly material or steel.
