Moreover, there are more than 90 independent sellers moving forklift materials and materials handling equipment. This system permits Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line impressively comprises of 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion forklifts. Capacities of these various vehicle versions vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift company in the North American market, due to their reliability in maintaining a high degree of consumer service quality and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division located in Cleveland has a expert team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial domestic lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled forklifts as part of a national equipment expansion project. Early sales of this industrialized equipment focused on large business communities, the armed forces and on state-run firms. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a lift truck manufacturing plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Daewoo began the first home-based lift truck business in 1967, and rapidly gained a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological enhancements combined with sales success placed them in a situation of substantial growth of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to assist them in the highly competitive North American materials handling market. This joint-venture proved highly successful for Daewoo and their lift truck sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the company had a global sales system and started exporting versions they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
